## IN THE CLAIMS

Please amend the claims as follows:

- 1. (Currently Amended) A coated super-hard abrasive comprising a core of super-hard abrasive material, an inner layer of a metal carbide, nitride, or boride or carbonitride chemically bonded to an outer surface of the super-hard abrasive material and an outer layer of a metal carbonitride deposited on the inner layer.
- 2. (Currently Amended) [[A]] <u>The</u> coated super-hard abrasive according to claim 1, wherein the outer layer is formed of titanium carbonitride.
- 3. (Currently Amended) A coated super-hard abrasive according to claim 1 or claim 2, wherein the outer layer is deposited by physical vapour deposition.
- 4. (Currently Amended) [[A]] <u>The</u> coated super-hard abrasive according to any one of the <u>preceding claims claim 1</u>, wherein the ultra-hard abrasive material is diamond or cBN based.
- 5. (Currently Amended) [[A]] <u>The</u> coated super-hard abrasive according to claim 4, wherein the ultra-hard abrasive material is selected from the group <u>comprising consisting of diamond grit</u>, [[or]] cBN grit, a PCD substrate, a thermally stable PCD (TSPCD) substrate, a PcBN substrate, a CVD diamond film, and a single crystal diamond substrate.
- 6. (Currently Amended) [[A]] The coated super-hard abrasive according to any one of the preceding claims claim 1, wherein the inner layer is formed from an element capable of forming [[(]] singly or in combination, [[)] carbides, nitrides or borides to the surface(s) of the abrasive material using a hot coating process.

Application No. 20/586,393 Reply to Office Action of November 1, 2007

- 7. (Currently Amended) [[A]] <u>The</u> coated super-hard abrasive according to claim 7, wherein the element is selected from the group comprising groups IVa, Va, VIa, IIIb and IVb of the periodic table.
- 8. (Currently Amended) [[A]] <u>The</u> coated super-hard abrasive according to any one of the preceding claims claim 1, wherein the inner layer is a titanium or chromium carbide coating in the case of a diamond based core, or a titanium or chromium nitride, boride or boronitride coating in the case of a cBN based core.
- 9. (New) The coated super-hard abrasive according to claim 1, wherein the inner layer is a titanium or chromium carbide coating and the core is diamond based.
- 10. (New) The coated super-hard abrasive according to claim 1, wherein the inner layer is a titanium or chromium nitride, boride or boronitride coating and the core is cBN based.
